About CANP

The **California Association for Nurse Practitioners (CANP)** provides a forum and unifying voice for more than 40,000 nurse practitioners statewide, often joining forces with other state and national organizations, to advance the profession and bridge health care needs.

As the only association solely dedicated to advocating for nurse practitioners in California, we work to protect and expand the critical roles filled by NPs. As a conduit of information, we foster the dissemination of ideas, advice and standards of practice. As a network of professionals, we bring NPs together to enhance their collective potential.

In today's dynamic health care environment, CANP plays a vital role in defining and communicating the essential value of the NP in delivering improved health care to Californians.

About the Annual Educational Conference

Imagine being in a room surrounded by involved and dedicated professionals who are there to hear what you have to say. Imagine an ultra-attentive audience gathered to discover the solutions that you can provide. This is the spirit of the CANP conference, where the future of health care is addressed and defined.

Sponsors and exhibitors will meet nurse practitioners (NPs) who are seeking the tools and strategies they need to elevate their practices to new heights. This is where they come to find the information, motivation, and inspiration that can change the face of health care for practitioners and patients alike. It is the ideal place to generate contacts and forge lasting relationships rich with mutual benefits.

What they're saying about the CANP 2026 Educational Conference

- *"...It's a great opportunity to learn, to grow, and to figure out what interests you, what new knowledge you acquire from meeting all these people."*
- *"...I love being around all the other nurse practitioners in this conference and being part of a society that really values us."*
- *"...I've seen the value of community here at the conference and just networking with other people that have similar goals, similar values, and just similar work-life balances...So I think that's encouraged me."*
- *"...we actually really encourage our students to be a part of this organization because that's where they see role models. They can learn from these leaders. It's something...it's hard to explain it, but it's something heartfelt. Something that really gives me passion and gives me reason to be in this job."*
- *"...I have had great, or still have great, NP mentors. There's an NP mentoring me in academia, there's an NP mentoring me in practice. So NPs, they come in different forms and sizes and forms and specialties, and it's just awesome how our leaders have set the standard for us. So it's just nice to be walking side by side with them, and having been mentored by wonderful NPs."*
